

# InBio-series IP-based Biometric Door Access Control Panel

InBio460

InBio160

InBio260

## Truly Internal Biometric Identification

InBio carries out the matching of fingerprints on the panels. The FR Series of readers transmit fingerprint templates to InBio via RS485 for fast and accurate matching with templates stored in the database. Wiegand inputs are also provided for traditional RFID readers.

## More than Door Control

Access additional control and interface. After programming, auxiliary relays can be functioned as lights, alarms and intrusion detection panels. Extra locking devices or gate controllers can be accessed.

## Communication

InBio controllers can be installed easily on your network and support both TCP/IP and RS-485 communication. Auto-discovery tool allows setting and modification of network parameters directly and easily.

## Options

InBio controllers come in 3 sizes to suit project needs and reduce the cost of unused capacity. 1-door, 2-door, and 4-door models can be mixed and matched in an optimized system architecture.

## Capacity

Support up to 3000 fingerprint templates, 30,000 badge users and store up to 10,000 events and transactions. Data is preserved if power is lost. Controller continues to operate if network connection is interrupted.

## Advanced Access Control Built-In

Anti-Passback, First-Card Opening, Multi-Card Opening, Duress Password Entry, and Auxiliary input/output linkages are built into controller firmware.

## Lowest Total Cost of Ownership

Save cost. Controller firmwares can be upgraded without any advanced tools. New features can extend and expand the value of your investment.

## For Software Developers

Free SDK is available for integrators and OEM's to integrate the InBio controller with their or existing security or personnel management applications. Upon request, ZK can customize InBio firmware to meet any customer requirements.
